Bringing Digital Innovation to Rural Communities

Mobile Labs on the Move

Two cutting-edge Mobile Labs - one specialising in digital fabrication and the other in multimedia creation - will travel across towns, villages, schools and businesses, offering hands-on access to the latest digital and creative technologies.

These mobile units bring high-quality equipment directly to communities, helping people learn by doing and explore tools that spark creativity, innovation and new skills.

"What's Inside the Labs?"

Digital Fabrication Lab

· Vinyl Cutters & Heat Press
· 3D Printers
· Laser Cutters
· CNC Routers
· 3D Scanners
· VR Headsets
· Robotics Kits

Multimedia Lab

· Video & Podcast Recording Gear
· Professional Lighting & Audio
· DSLR & 4K 360 Cameras
· Editing Laptops (Adobe / Audio Tools)
· Digital Storytelling Tools
· VR Drone Equipment

Want the Mobile Labs in Your Area?

We'd love to bring the Mobile Labs to your community group, school, business or event.

The Digital Services, Supports and Spaces (DS3) Project is driving rural digital transformation
enabling skills, creativity, innovation and community-led digital solutions across the Central Border Region.
